

Waite Diagnostics

Price List (may change without prior notice) Commercial testing of grapevine viruses and other pathogens

Price per single sample¹: (For example: The price for testing nine samples for one virus: 9 x \$84 = \$765 + GST)

No. of samples	One Virus (\$AU)	Viruses in list A1 (\$AU)	Complete test (list A1 + A2) (\$AU)	Lists A2 & B (phytoplasmas) (\$AU) ²	List C (DNA typing) (\$AU)
1-9	84	163	175	92	120
10-19	76	146	161	84	“
20-49	63	133	144	72	“
50-99	58	114	128	66	“
100-199	53	102	112	55	100

¹, Where applicable, a 10% GST will be added to these prices.

², The same price applies for testing for *Agrobacterium vitis* (crown gall) and *Xylella fastidiosa* (Pierce's disease) by PCR.

New ⇒ Price for DNA typing (grape variety ID): \$120 (excluding GST).

Please note: additional quarantine charges and fees are applicable to overseas samples.

List A1

- Grapevine leafroll-associated viruses (detecting leafroll virus types 1-5, and 9)
- Grapevine virus A (GVA)
- Grapevine virus B
- Rupestris stem pitting associated virus (RSPaV)
- GLRaV-2 strain: Red Globe leafroll, **New**. Please note vines positive for this virus should not be grafted on 5 BB, 5C, 3309C and 1103P rootstocks.
- Grapevine fleck virus (strains A & B)
- Grapevine fanleaf virus (GFLV)

List A2 (generic test only, using two-step nested PCR):

- Australian grapevine yellows phytoplasma
- Buckland Valley grapevine yellows phytoplasma (**New**)
- Tomato big bud (TBB) phytoplasma
- All grapevine phytoplasmas exotic to Australia (on request)

List B (tested by PCR on request):

- Viruses: *Tomato ringspot virus* (e.g. in seed lots), *Arabidopsis mosaic virus*, *Raspberry ringspot virus*, GVD, etc. Please enquire).
- Agrobacterium vitis* (crown gall)
- Xylella fastidiosa* (Pierce's Disease)
- Wheat streak mosaic virus*

List C (DNA typing): for any plant
